

With the contribution of the LIFE financial instrument of the European Community

• R. Löwner, A. Souhel, J. Wächter, F. Krysiak and the SaDIN Working Group

Sahel - Doukkala Scientific Information Network

Realisation of an online geoinformation system in Morocco

Sahel - Doukkala Scientific Information Network

Realisation of an online geoinformation system in Morocco

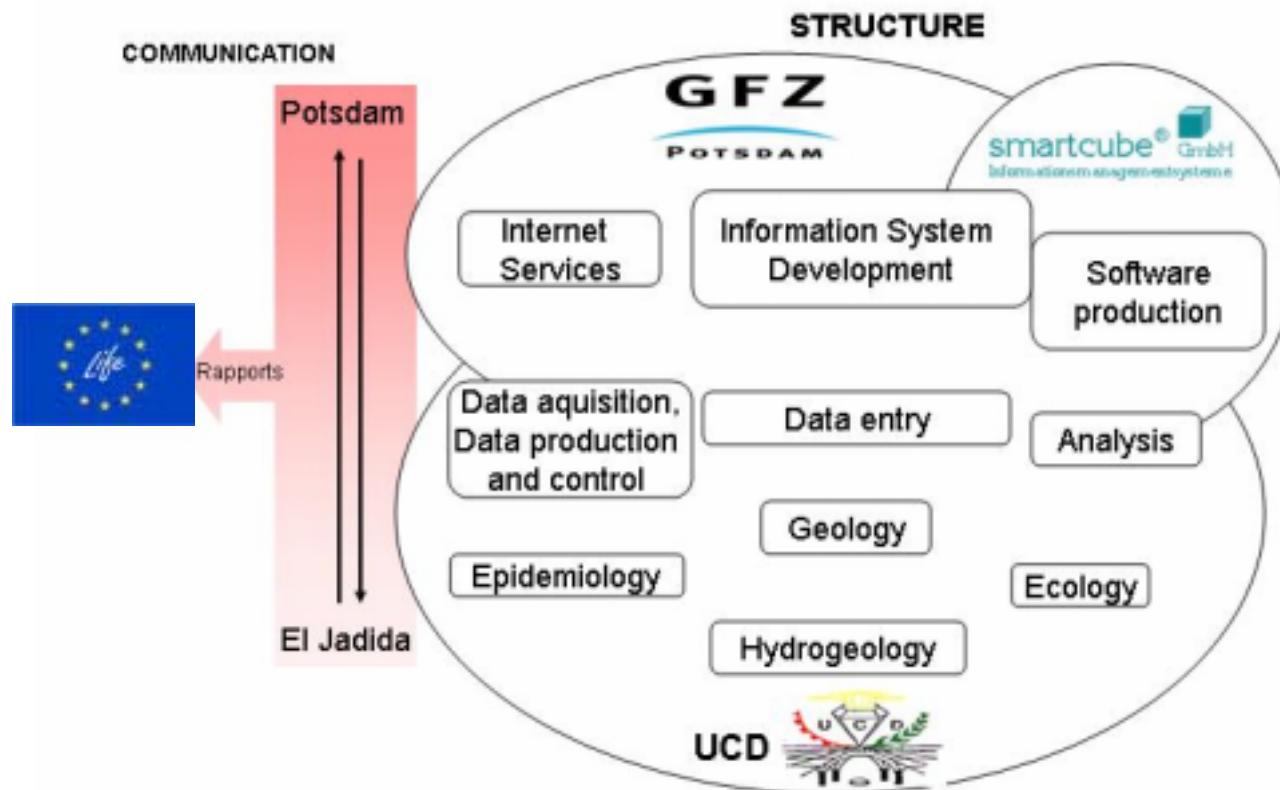

1. General set-up & Digital Divide
2. Environmental problems – the investigation area
3. The working groups and scientific results
4. The realisation of the data and information system
5. SaDIN – what could it be in the future

1. General set-up & Digital Divide

EU Projects

LIFE -Third countries

[http://ec.europa.eu/e
nvironment/life/](http://ec.europa.eu/environment/life/)

Start

: January 2004

Total Costs

: 589 832,- € (with 70 % contribution from the EU)

Duration

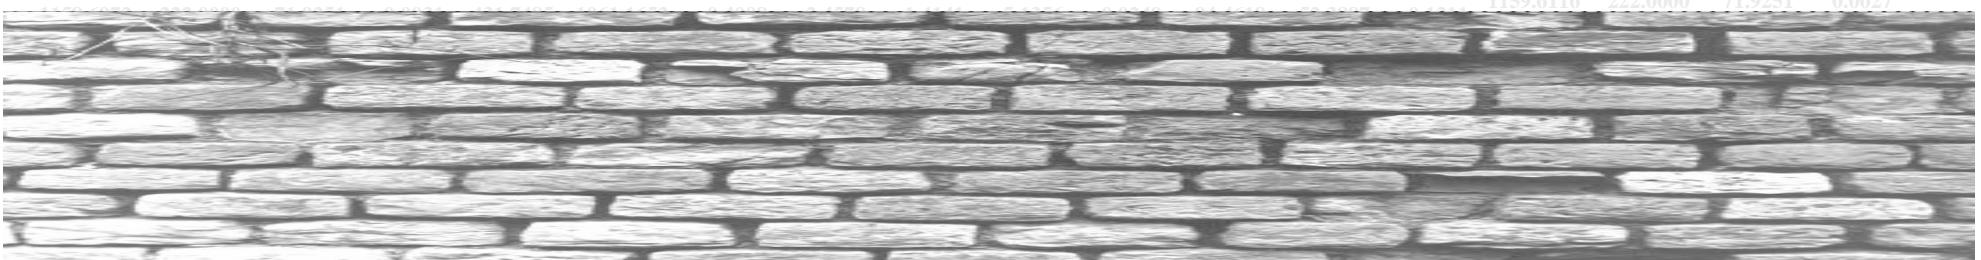

: 2 Jahre

Employees

: 25

1. General set-up & Digital Divide

for all

worldwide

real time

Internet users of large regions

Internet Supported Scientific Information Network

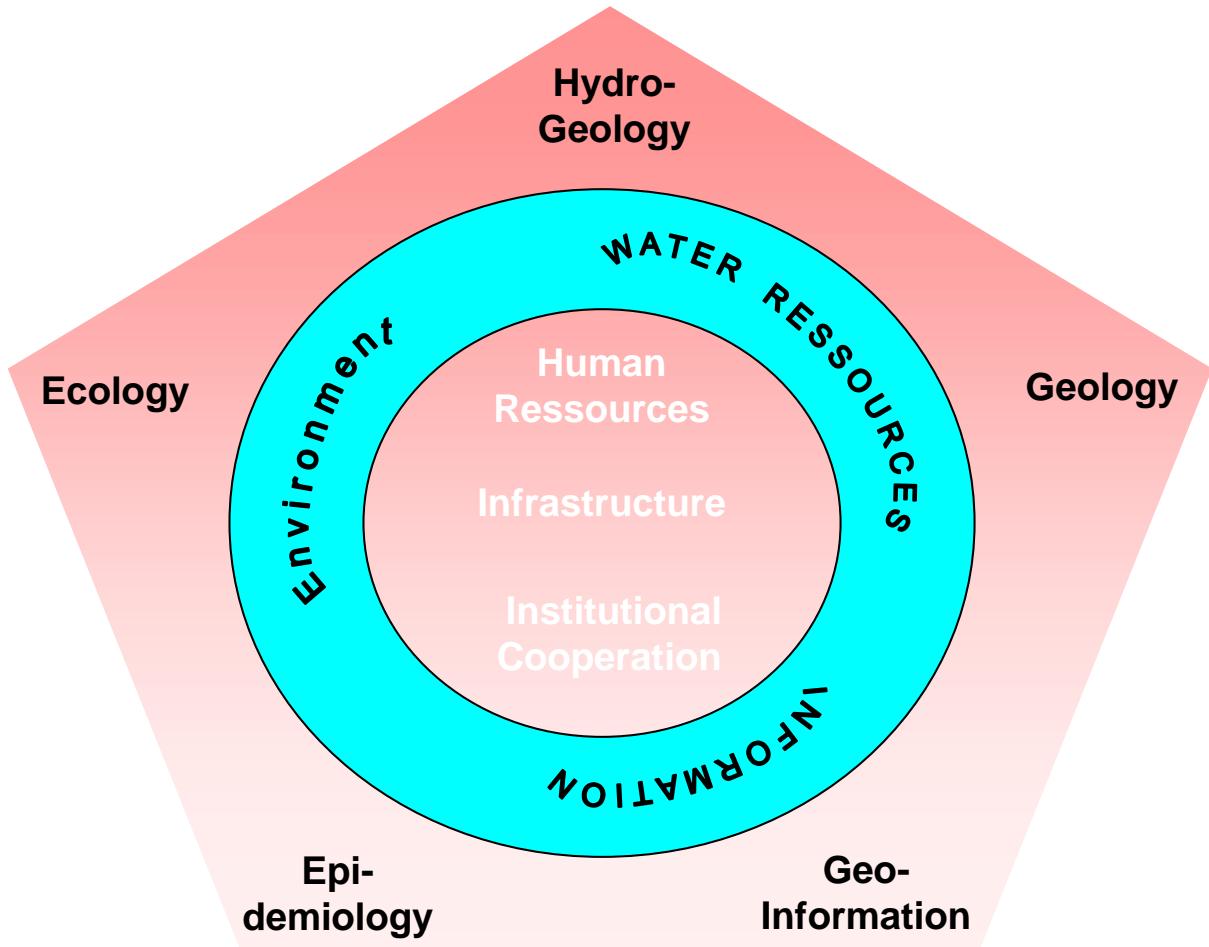

2. Environmental problems – the investigation area

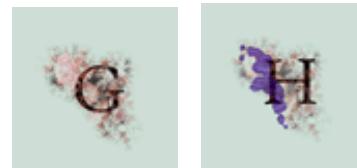

2. Environmental problems – the investigation area

1. Salty water infiltration
2. Ground water pollution
3. Desertification
4. Waste management – “illegal waste dumps”
5. Health

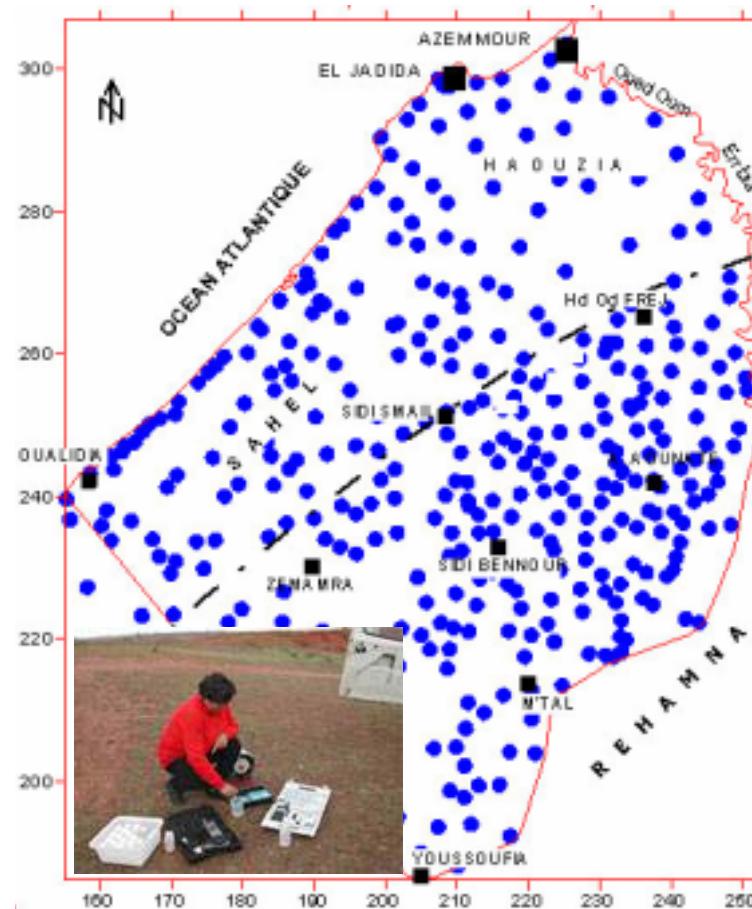

3. The working groups and scientific results

Geology & Hydrogeology

- Inventory, revising and update of the data from previous borehole analyses and their storage on digital support
- Acquisition of topographic and geological data and his digital processing
- Analyse of about 400 wells and interpretation of about 300 soundings
- Drilling investigations and measurements on sections vertical to the coastline
- Installations for the supervision of marin water intrusion

3. The working groups and scientific results

Ecology

- Inventory of all available data
- Remote sensing and analyse of physical and ecological surface parameters
- Phytoecological surveying and mapping, determination of soil properties and land use
- Regional specification of marine fauna of the Sahel coastal area
- Detection and definition of the problem areas regarding to desertification and illegal waste dumps

3. The working groups and scientific results

Epidemiology

- Analyse of the actual situation of the public health of the endangered population
- Analyse of the impact of solid and fluid waste on the population and of polluted water from illegal waste dumps
- Physical examination of about 800 people, living in endangered areas
- Cytogenetics: 30 persons

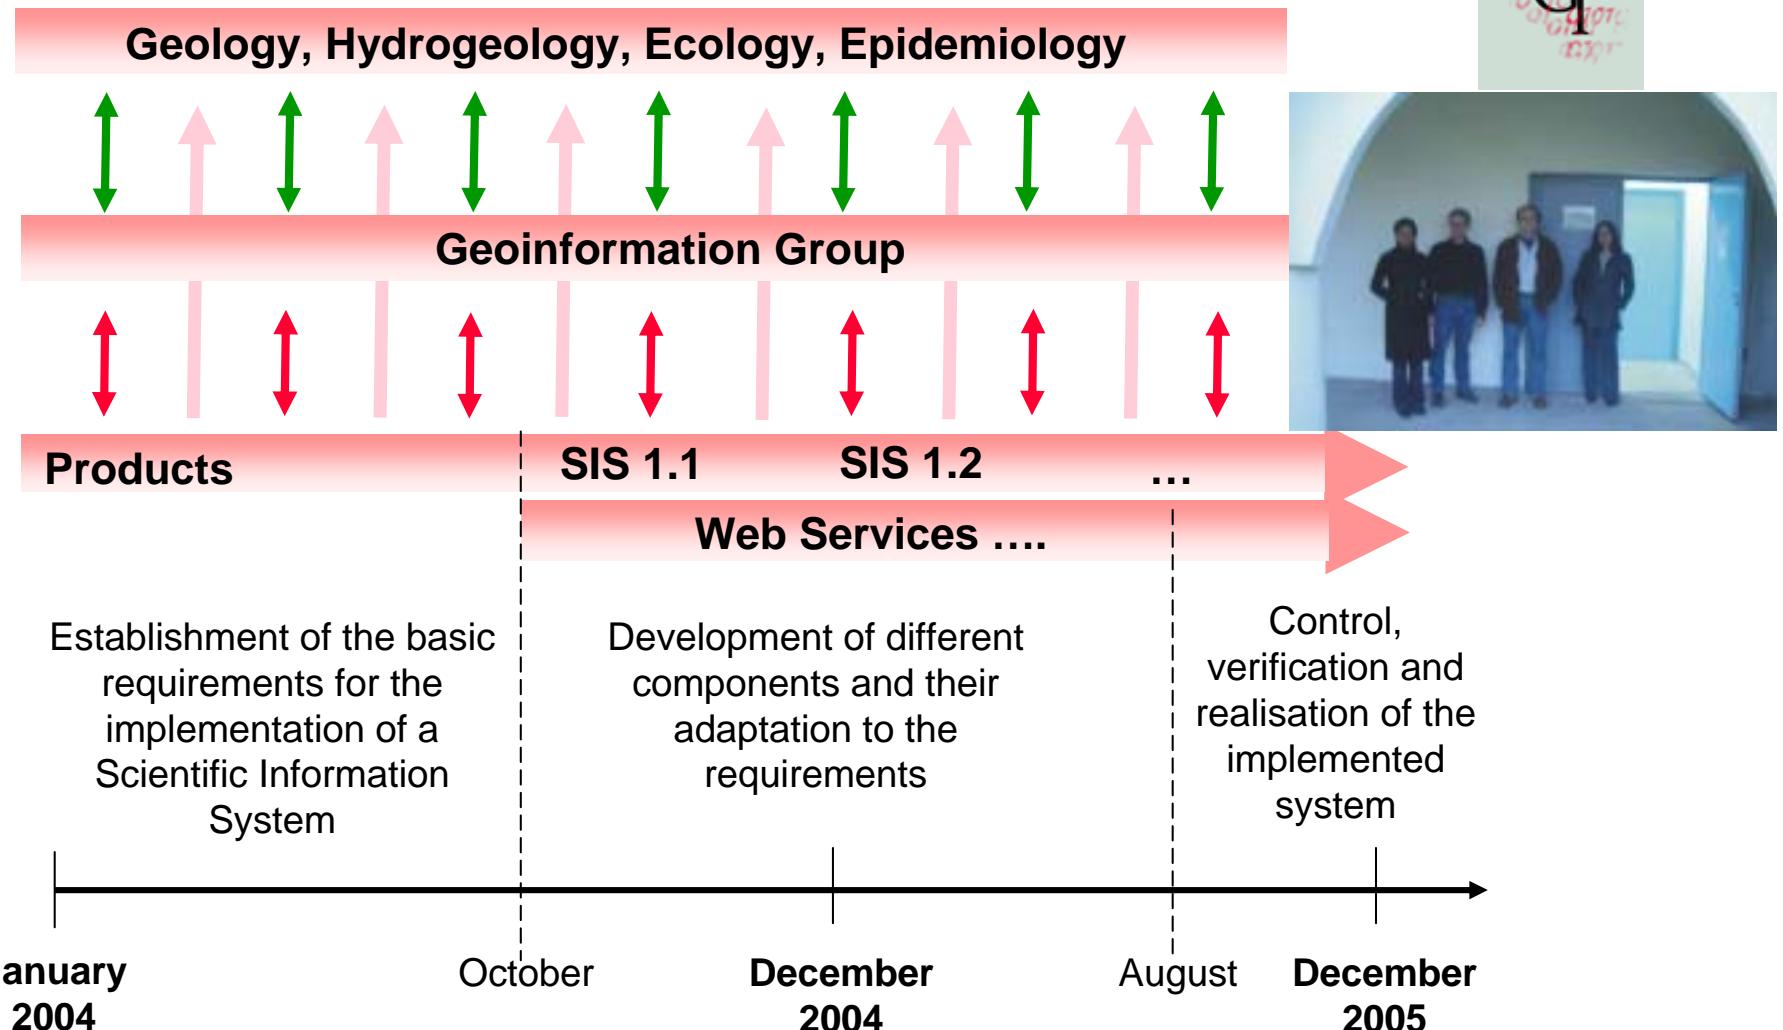

Infectious diseases

genetic modifications

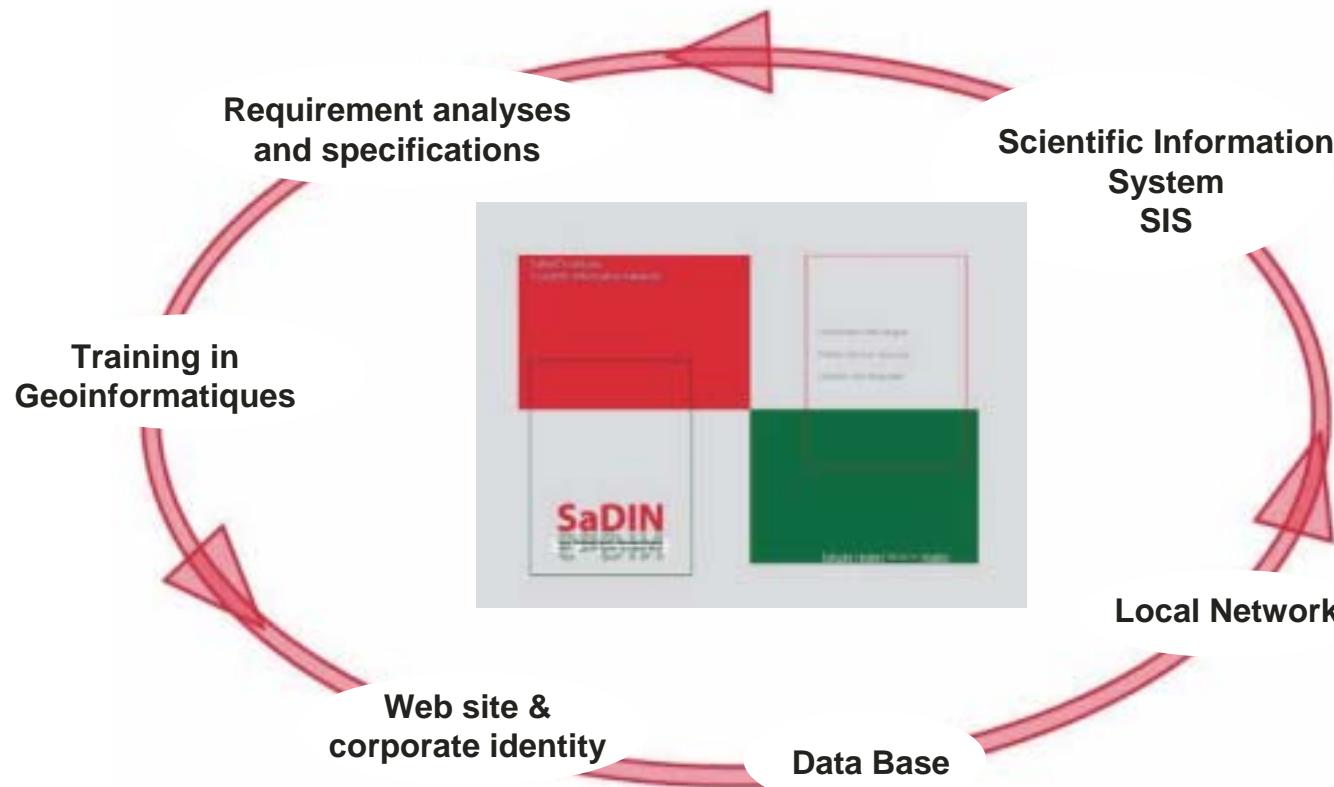

4. The data & information system

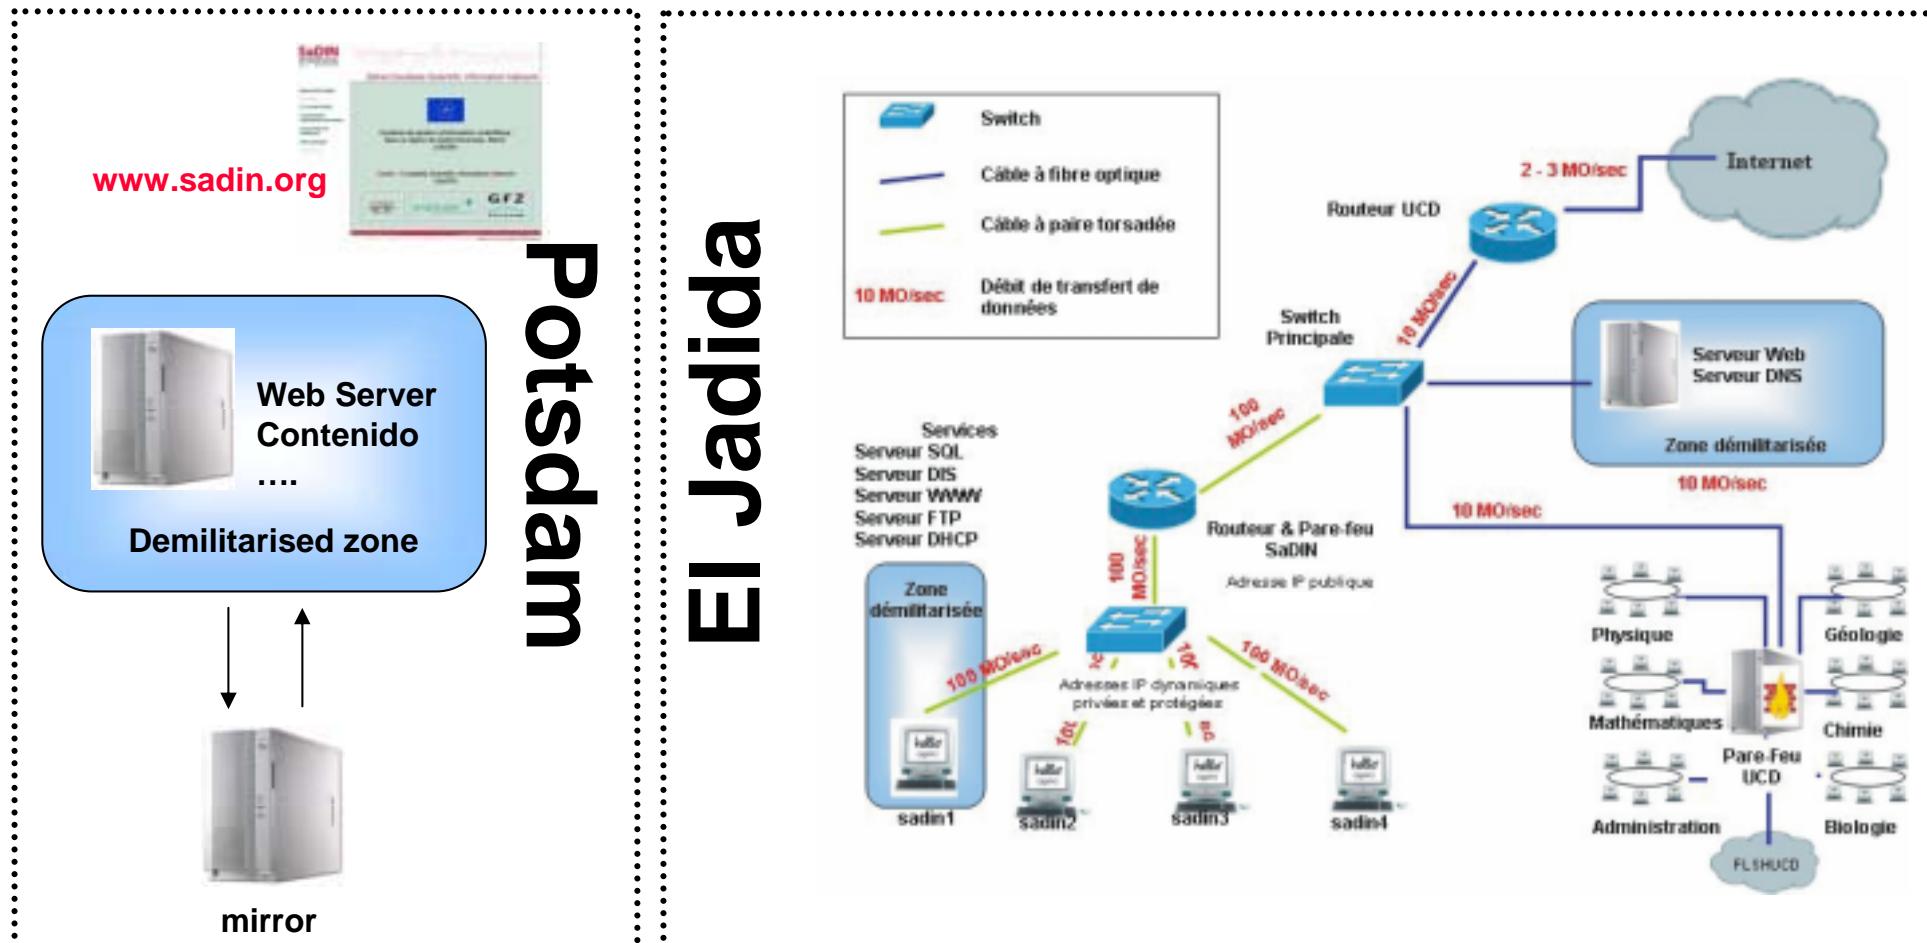

4. The data & information system

January – October 2004

Establishment of the basic requirements for the implementation of a Scientific Information System

4. The data & information system
